

Helix Capital Partners

Due Diligence Report — Confidential

1. Investment Thesis

Helix Capital Partners has identified a compelling opportunity in the mid-market SaaS sector, with primary focus on companies demonstrating consistent ARR growth above 30% YoY and net revenue retention exceeding 115%. The target portfolio allocation for this vertical is \$120M across 6–8 positions.

2. Financial Summary

Metric	FY2023	FY2024	FY2025E
ARR (\$M)	18.4	26.7	38.2
YoY Growth	—	+45%	+43%
Gross Margin	71%	74%	76%
NRR	112%	118%	121%
Burn Multiple	1.8x	1.2x	0.9x

3. Risk Factors

Key risks include customer concentration (top 3 accounts = 31% of ARR), competitive pressure from well-capitalised incumbents, and dependency on a single cloud provider for 94% of infrastructure. These risks are considered manageable within the proposed deal structure.

4. Recommendation

The investment committee recommends proceeding to term sheet with a proposed valuation of \$185M (6.9x ARR). Lead partner: Dr. Elena Vasquez. Target close: Q3 2025.
