

# GlobalHR Portal — Employee Feedback Submissions

## Q2 2025 · Anonymised Survey Responses · Internal Distribution Only

The following feedback submissions were collected from employees across regional offices during the Q2 2025 engagement survey. Responses are reproduced verbatim and have not been edited or filtered. Some submissions are in the respondent's native language.

### Section 1 — English Responses

#### Response EN-001

The new flexible working policy has made a significant difference to my work-life balance. I feel more trusted and productive as a result. The onboarding process for new team members could be improved — it currently takes too long to get system access provisioned.

#### Response EN-002

Management communication has improved over the past two quarters. The quarterly all-hands format works well. My main suggestion would be to introduce more structured career development conversations at the team level.

### Section 2 — Regional Language Responses

The following responses were submitted in the respondent's preferred language. Translation has not been applied in order to preserve the original meaning.
